EDUCATION

University of Virginia, School of Data Science, Charlottesville, VA *Expected August 2027*
Master of Science in Data Science, Genomics Data Science Concentration
Relevant Coursework: Computation for Data Science, Machine Learning I: Introduction to Predictive Modeling, Data Engineering I: Data Pipeline Architecture, Genomics Foundations

University of Virginia, College of Arts and Sciences, Charlottesville, VA *May 2025*
Bachelor of Arts in Applied Statistics & Psychology, Data Science Concentration
Relevant Coursework: Machine Learning and Data Mining, Statistical Machine Learning, Data Analysis with Python, Data Visualization and Management, Introduction to Regression Analysis, Applied Analytics for Business

RESEARCH EXPERIENCE

Research Assistant, **ViDAR Lab, UVA School of Data Science**, Charlottesville, VA *October 2026 – Present*

- Led a 200-participant study on designers' tacit knowledge in visualization design end to end, from recruitment and experiment build-out to post-study interviews and qualitative analysis.

WORK EXPERIENCE

University of Virginia Charlottesville, VA
Organizational Excellence Project Associate *August 2026 – Present*

- Support organizational consulting and strategic initiatives across university units through data analysis, research, stakeholder engagement, and project coordination.
- Develop and maintain analytical resources, dashboards, and reporting materials to help stakeholders interpret data and inform planning and decision-making.
- Collaborate with faculty, staff, and university partners on projects requiring research, data validation, workshop facilitation, and results documentation.

Organizational Excellence Project Associate Intern *August 2023 – June 2025*

- Designed and delivered sessions with faculty, staff, and student stakeholders, including monthly pop-up workshops tailored to project needs.
- Prepared resources, research materials, and results documentation for consulting projects across the School of Nursing, School of Data Science, School of Engineering, and Library Tech Services; verified data accuracy and validity.
- Maintained an internal engagement dashboard using monthly Google Analytics data and generated reports to support outreach efforts and interpret website traffic.

EAB Washington, DC
Associate Strategic Analyst *July 2025 – August 2026*

- Created and executed data-informed marketing strategies by aligning audience insights with partner goals for a book of 30+ partners, resulting in more targeted and effective campaign outreach; utilized Workfront to manage campaign tasks and Jira to submit tickets for cross-functional collaboration.
- Delivered proactive analytical support and campaign monitoring to partner account teams, identifying optimization and up-sell opportunities through dashboards and visual reports.
- Utilized Snowflake, Tableau, and Excel to project, track, and communicate campaign outcomes; presented findings to account teams and management to guide strategic decisions.
- Developed custom Python and R analyses and automated email scripts, saving the team 150+ hours per month by streamlining repetitive manual workflows and reducing time spent on routine campaign tasks.

Aramark Charlottesville, VA
UVA Dine Marketing Intern *August 2024 – May 2025*

- Established marketing plan for promotional campaigns and branding strategies including pop-ups and weekly specialty nights; recommended Instagram content that increased account engagement.
- Measured and examined marketing data from previous campaigns to understand trends and optimize future campaigns to boost engagement and reach.

NVIDIA Santa Clara, CA
Talent Intelligence & Attraction Data Analyst Intern *May 2024 – August 2024*

- Reviewed internal data from over 10,000 observations to design a mock candidate profile using R; leveraged the profile to extract insights from external sources including LinkedIn Talent Insights and Lightcast, informing analysis of labor market trends.
- Built a dynamic Power BI Hardware Recruiting dashboard focused on five U.S. regions used by sourcers, recruiters, operations, and leadership; the dashboard supported headcount planning and strategic recruiting decisions.

KEY PROJECTS

Patient Satisfaction Prediction Model

- Developed a predictive model in R integrating tree-based algorithms and natural language processing to analyze patient reviews, assign sentiment scores from text, and leverage techniques such as zero-shot classification and bootstrapping.

Factors Affecting Fertility Rates in the U.S.

- Developed a predictive model analyzing factors affecting fertility rates in the U.S. using R. Applied multiple linear regression, Lasso regression, and tree-based methods to address multicollinearity and examine predictive relationships.

Transcending Boundaries: Closing the Education Gap

- Analyzed socioeconomic and educational data from the U.S. Census and Virginia Department of Education to identify resource disparities across Charlottesville elementary schools and recommend targeted funding and support programs.

LEADERSHIP

MSDS Residential Student Ambassador, **UVA School of Data Science**, Charlottesville, VA *August 2026 – Present*

- Selected as one of fourteen Residential Student Ambassadors to represent the School of Data Science Residential MSDS program and foster engagement among prospective, admitted, and current students.
- Mentored 10+ prospective and admitted students by sharing firsthand experiences and fostering open dialogue about graduate school, academics, and the MSDS student experience.
- Represent the School of Data Science at 12+ events per semester, connecting with prospective and current students through tabling, building tours, information sessions, 1:1 meetings, and email outreach.

Intern Ambassador, **NVIDIA**, Santa Clara, CA *May 2024 – August 2024*

- 1,200 HQ Intern cohort broken down into 4 teams, picked as one of the team leaders for Team Emerald consisted of around 280 interns
- Planned intern events focused on diversity, belonging, and engagement, including Great America Night, a team scavenger hunt, and Speaker Series pop-up quizzes.
- Guided Team Emerald to first place in the summer-long Intern Cohort Competition.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS, R
