

ANH LY

anhly@virginia.edu

EDUCATION

University of Virginia, School of Data Science, Charlottesville, VA

Expected August 2027

Master of Science in Data Science

Genomics Data Science Concentration

Relevant course work: Computation for Data Science, Machine Learning I: Introduction to Predictive Modeling, Data Engineering I: Data Pipeline Architecture, Genomics Foundations

University of Virginia, College of Arts and Science, Charlottesville, VA

May 2025

Bachelor of Arts in Applied Statistics & Psychology

Relevant course work: Research Methods & Data Analysis I, Research Methods & Data Analysis II, Intro to Biology, Programming for Data Science, Intro to Data Science with R, Foundations of Statistics, Introduction to Regression Analysis, Machine Learning and Data Mining, Data Visualization and Management, From Data to Knowledge, Intro to Mathematical Statistics, Data Analysis with Python, Statistical Machine Learning, Design & Analysis of Sample Surveys, Applied Analytics for Business

Broad Run High School, Ashburn, VA

June 2021

Advanced Studies Diploma

GPA: 4.6/4.0

WORK EXPERIENCE

Associate Strategic Analyst, **EAB**, Washington, DC

July 2025 - Present

- Created and executed data-informed marketing strategies by aligning audience insights with partner goals, resulting in more targeted and effective campaign outreach; utilized Workfront to manage campaign tasks and Jira to submit tickets for cross-functional collaboration
- Delivered proactive analytical support and campaign monitoring to partner account teams, identifying optimization and up-sell opportunities through dashboards and visual reports
- Utilized Snowflake, Tableau, and Excel to project, track, and communicate campaign outcomes; presented findings to account teams and management to guide strategic decisions

UVA Dine Marketing Intern, **Aramark**, Charlottesville, VA

August 2024 - May 2025

- Established marketing plan for promotional campaigns and branding strategies like pop-ups, weekly specialty nights; recommended Instagram content increased account engagement
- Measured and examined marketing data from previous campaigns to understand trends and optimize future campaigns to boost engagement and reach

Talent Intelligence & Attraction Data Analyst Intern, **NVIDIA**, Santa Clara, CA

May 2024 - August 2024

- Reviewed internal data from over 10,000 observations to design a mock candidate profile using R; leveraged profile to extract insights from external sources like LinkedIn Talent Insights and Lightcast, informing analysis of labor market trend
- Built a dynamic Power BI Hardware Recruiting dashboard focused on 5 U.S. regions used by sourcers, recruiters, operation, and leadership; business analytics dashboard provides insights for important function makes headcount planning and strategic recruiting easier

Organizational Excellence Project Associate Intern, **University of Virginia**, Charlottesville, VA

August 2023 - June 2025

- Design and delivery of sessions with faculty, staff and student stakeholders usually for monthly pop-up workshop depending on case by case basis
- Prepared resources, research materials and result documentation on various consulting projects as team needed; assisted in Strategic Planning for School of Nursing, School of Data Science, School of Engineering, Library Tech Services to name a few; verified data accuracy and validity
- Maintain internal engagement dashboard takes in monthly website data from Google Analytics, generates data reports for team to help boost outreach and interpret site traffic

KEY PROJECTS

Patient Satisfaction Prediction Model

- Developed a predictive model using R integrated tree-based algorithms and natural language processing to analyze patient reviews, assigning sentiment scores based on text analysis and leveraging techniques such as zero-shot classification and bootstrapping for enhanced accuracy

Factors Affecting Fertility Rates in the U.S.

- Developed a predictive model analyzing factors affecting fertility rates in the U.S. using R, achieving an accuracy rate of 58.87%. The model employed multiple linear regression and Lasso techniques to handle multicollinearity, alongside tree-based models and natural language processing for data interpretation

Transcending Boundaries: Closing the Education Gap

- Analyzed socioeconomic and educational data from the U.S. Census and Virginia DOE to identify resource disparities across Charlottesville elementary schools, recommending targeted funding and support programs to address racial achievement gaps, particularly at Trailblazer Elementary

LEADERSHIP

Intern Ambassador, **NVIDIA**, Santa Clara, CA

May 2024 - August 2024

- 1,200 HQ Intern cohort broken down into 4 teams, picked as one of the team leaders for Team Emerald consisted of around 280 interns
- Planned intern events to promote diversity and belonging, led intern events UR team hosted like Great America night, Team Scavenger Hunt, and Speaker Series Pop-Up Quizzes
- Guided Team Emerald to placing first in Summer-long Intern Cohort Competition
